What is (at least) one question you have for the requesting organization?

Please note any line items you find unclear or questionable.

ASG may not use state funds for any event which promotes or advocates for a specific religious or political ideology. Further, we have established that we will not fund off-campus excursions or anything which will be sold to students. Do you have any concerns that this grant proposal may violate one of these rules?

Should ASG fund this event? If so, should it be funded in part or in whole and why?
